**Ofsted Registered Childminding Service**

## **First Aid Policy**

I have undertaken a Paediatric First Aid Course with Southern First Aid Training and this certificate is valid until 17 February 2021.

During my training I was instructed on how to give adult /child and baby CPR and what to do in the event of choking. I was instructed on how to deal with flesh wounds, electric shocks and how to recognise the symptoms of many childhood illnesses and what to do. I was also instructed on how to deal with allergic reactions, heat exhaustion, hyperthermia, etc. My Insurance Policy with Morton Michel covers me to carry out the procedures learned on this course.

The welfare of your child is paramount therefore if I am at all unsure about the procedure, or concerned regarding the physical condition of your child whilst in my care I will contact either you the Parents, a member of their nursing team or the emergency services depending on the severity of the situation.

I will document all procedures that I have carried out and ask that you sign this record.

I will require that you keep me informed as to the current health of your child and if there are any changes to their condition, treatment or medication.
